

# Safety Data Sheet

Bluing Reagent, Scott's Substitution

Revision Date: 06/09/15

## 1. PRODUCT AND COMPANY IDENTIFICATION

**Product name:** Bluing Reagent- Scott's Substitution  
**Product code:** 400647

**Supplier:** HealthLink, Inc  
3611 St Johns Bluff Road, Suite 1  
Jacksonville, FL 32224  
800-638-2625  
Monday-Friday: 8:00 -5:00 PM

**Synonym:** None.  
**Material uses:** Laboratory Reagent.  
**Validation date:** 01/13/2014  
**In case of emergency:** 800-424-9300 CHEMTREC (USA)  
24 Hours/Day: 7 Days/Week

## 2. HAZARDS IDENTIFICATION

### Emergency Overview

Target Organs: Central nervous system, blood, liver, kidneys, and heart

### GHS Labeling, Pictograms

**Signal word: Danger!**

### Hazard statement(s):

- H317:** May cause an allergic skin reaction (Cat 1)
- H334:** May cause allergy or asthma symptoms or breathing difficulties if inhaled (Cat 1)
- H340:** May cause genetic defects (Cat 1)
- H350:** May cause cancer (Cat 1)
- H361:** Suspected of damaging fertility or the unborn child (Cat 2)

### Precautionary statement(s):

- P261:** Avoid breathing dust, fumes, or mist
- P264:** Wash hands thoroughly after handling
- P280:** Wear protective gloves/protective clothing/eye protection/face protection

### OSHA Hazards

No known OSHA hazards.

### GHS Classification

Respiratory sensitizer (Category 1), Skin sensitizer (Category 1), Germ cell mutagenicity (Category 1), Carcinogenicity (Category 1), Reproductive toxicity (2)

### NFPA

Health Hazard: 2

### HMIS Classification

Health Hazard: 2

Fire:0  
Reactivity: 0

Flammability: 0  
Physical hazards: 0

### Potential Health Effects

Inhalation –May be harmful if inhaled.  
Skin - May be harmful if in contact with skin.  
Eyes - May be harmful if in contact with eyes.  
Ingestion –May be harmful if ingested.

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Name	CAS number	% v/v
Magnesium Sulfate	100034-99-8	2
Sodium Bicarbonate	144-55-8	<1
Formaldehyde	50-00-0	<1
Water	7732-18-5	Balance

## 4. FIRST AID MEASURES

**Eye contact:** Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

**Skin contact:** In case of contact, flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

**Inhalation:** Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

**Ingestion:** Call medical doctor or poison control center immediately. Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

## 5. FIRE-FIGHTING MEASURES

**Flammability of the product:** Not flammable

**Extinguishing media:** Water spray, dry chemical, CO<sub>2</sub>, and foam.

**Not suitable:** Do not use water jet.

**Special exposure hazards:** May emit toxic fumes under fire conditions.  
**Hazardous thermal**

**decomposition products:** Decomposition products may include the following materials:  
Oxides of carbon

**Special protective equipment for fire-fighters:** Fire-fighters should wear protective clothing with NIOSH approved breathing apparatus. Products of combustion may be harmful in fire situation. Do not use direct water stream.

**Special remarks on explosion hazards:** May emit toxic fumes under fire conditions.

## 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions:** No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).

**Environmental precautions:** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

**Spill:** Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container.

## 7. HANDLING AND STORAGE

**Handling:** Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use empty containers to retain product, residue can be hazardous. Do not reuse container.

**Storage:** Store in accordance with local regulations. Store in a segregated and approved area. Store in original container, protected from direct sunlight. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Consult local authorities for acceptable exposure limits.

<b>Formaldehyde</b>	<b>OSHA TWA</b>	<b>0.75 ppm</b>
	<b>ACGIH</b>	<b>0.3 ppm</b>

**Engineering measures:** Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

**Hygiene measures:** Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**Personal protection**

**Respiratory:** Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Hands:** Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  
Recommended: neoprene

**Eyes:** Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Recommended: splash goggles

**Skin:** Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  
Recommended: lab coat

**Environmental exposure**

**controls:** Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

<b>Physical state:</b>	Liquid.	<b>Color:</b>	clear
<b>Flash Point:</b>	Not available.	<b>Odor:</b>	Odorless
<b>pH:</b>	Not available.	<b>Boiling/condensation point:</b>	~212°F
<b>Melting/freezing point:</b>	Not available.	<b>Relative density:</b>	Not available.
<b>Vapor pressure:</b>	Not available.	<b>Vapor density:</b>	Not available
<b>Odor threshold:</b>	Not available.	<b>Evaporation rate:</b>	Not available
<b>VOC:</b>	Not available.		
<b>Solubility:</b>	Soluble in the following materials: water		

## 10. STABILITY AND REACTIVITY

**Chemical stability:** The product is stable.

**Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous reactions will not occur.

**Hazardous polymerization:** Under normal conditions of storage and use, hazardous polymerization will not occur.  
**Conditions to avoid:**

**Materials to avoid:** Strong oxidizers, chromic anhydride, perchloric acids, ect.

**Hazardous decomposition products:** Oxides of carbon

**Conditions of reactivity:** Under normal conditions of storage and use, hazardous reactions will not occur

## 11. TOXICOLOGICAL INFORMATION

Principle Routes of Exposure: Skin, Eyes, and Respiratory Tract

### Acute toxicity

#### Oral LD50

Formaldehyde- Rat, 100 mg/kg

Sodium bicarbonate- Rat, 4220 mg/kg

#### Inhalation LC50

Formaldehyde- Rat, 203 mg/kg

#### Dermal LD50

no data available

### Other information on acute toxicity

no data available

**Ingestion:** No known significant effects or critical hazards except possibly in laboratory animals.

**Skin:** May cause allergic reaction

**Inhalation:** May cause allergy or asthma symptoms or breathing difficulties can occur

**Eye Contact:** May cause eye irritation

**Carcinogenicity:** May cause cancer

**Mutagenicity:** May cause genetic defects

**Teratogenicity:** No known significant effects or critical hazards except possibly in laboratory animals.

**Reproductive:** Suspect of damaging fertility or the unborn child

## 12. ECOLOGICAL INFORMATION

**Toxicity**

no data available

**Persistence and degradability**

no data available

**Bioaccumulative potential**

no data available

**Mobility in soil**

no data available

**PBT and vPvB assessment**

no data available

**Other adverse effects**

no data available

## 13. DISPOSAL CONSIDERATIONS

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national and local laws and regulations.

## 14. TRANSPORT INFORMATION

**DOT (US)**

Not regulated

## 15. REGULATORY INFORMATION

**United States**

**HCS Classification:** Not available

**U.S. Federal regulations:**

**TSCA 8(a) IUR:** No products were found.

**United States inventory (TSCA 8b):**No products were found.

**SARA 302/304/311/312 extremely hazardous substances:** Formaldehyde

**SARA 302/304 emergency planning and notification:** No products were found.

**SARA 302/304/311/312 hazardous chemicals:** No products were found.

**SARA 311/312 MSDS distribution - chemical inventory - hazard identification:** Formaldehyde.

**DEA List I Chemicals**

**(Precursor Chemicals):** Not listed

**DEA List II Chemicals**

**(Essential Chemicals):** Not listed.

**RTK:** MA, NJ, PA

**California Prop. 65,** This product does contains a chemical known to the State of California to cause birth defects or other reproductive harm.

**CANADA**

**WHMIS (Canada):**

None of the components are listed.

**Canadian lists: CEPA Toxic substances:** None of the components are listed.

**Canadian ARET:** None of the components are listed.

**Canadian NPRI:** None of the components are listed.

**Alberta Designated Substances:** None of the components are listed.

**Ontario Designated Substances:** None of the components are listed.

**Quebec Designated Substances:** None of the components are listed.

**CEPA DSL / CEPA NDSL:**

All components are listed or exempted.

*This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all the information required by the Controlled Products Regulations.*

**International regulations**

**International lists:**

**Australia inventory (AICS):** All components are listed or exempted.

**China inventory (IECSC):** All components are listed or exempted.

**Japan inventory:** All components are listed or exempted.

**Korea inventory:** All components are listed or exempted.

**New Zealand Inventory of Chemicals (NZIoC):** All components are listed or exempted.

**Philippines inventory (PICCS):** All components are listed or exempted.

## 16. OTHER INFORMATION

**National Fire Protection Association (U.S.A.)**

**Notice to reader**

The above information is believed to be correct but does not purport to be all-inclusive and shall be used only as a guide. Healthlink shall not be liable for any damage resulting from handling of contact with this product.
