

Bleach Germicidal Cleaners

PRODUCT SOLUTIONS

- EPA-registered to kill *C.diff* spores in 3 minutes*
- Proven efficacy against outbreak causing viruses

Ready-to-Use Bleach Cleaner Disinfectants

Clorox Healthcare® leads the way in bleach technology to help you take control in an ever-changing healthcare environment

- **Trusted** by over 2000 US hospitals as part of their infection control protocols.¹
- **Proven disinfection efficacy** against the most prevalent HAI causing pathogens and outbreak-causing viruses.
- ***C. difficile* sporicidal efficacy** tested in the presence of 3-part organic soil load.
- **Peer-reviewed clinical evidence** to support the role of Clorox Healthcare® Bleach Germicidal Cleaner as a key component of environment-focused HAI prevention strategies.
- **Reduces compliance risks and labor costs** associated with dilutable disinfectants. Pre-mixed ready-to-use cleaner disinfectant solutions eliminate hassles associated with dilution control systems.
- **Formulated for broad surface compatibility** and recommended in equipment cleaning and care guides.²

² For unfamiliar surfaces, test in a small, inconspicuous area first. Consult medical equipment warranty information and equipment care and cleaning guides prior to selecting and using any surface disinfectant.

Sodium hypochlorite breaks down into salt and water after use. To ensure that the salt left behind by bleach does not build up and cause surface damage over time, wipe down these surfaces after disinfecting with a clean, damp cloth.
